

Ain't Goin' Nowhere

ya think the latest plastic
is gonna save us from this plight
ya think that future science
will turn our wrongs to right
ya think the make believe guy
who rules us from the sky
will swoop on down
to save the true believers
these are lies

well I've got news for everybody
take some notes and pass it down
there ain't no god that's gonna save us
from the hell that's all around
and the world ain't goin' nowhere, but down

ya think the latest harvest
is gonna feed the billions more
ya think the newest medicine
will cure the human sore
ya think the brand new toys
will make us happy and content
when nothing else has worked before
and our future's all but spent

and the world ain't goin' nowhere, but down
and the world ain't goin' nowhere, but down
