

## Come Along

we're gonna heal the day  
we're gonna change the way  
we're gonna write this play  
instead of fading away  
stop fading away  
we're not fading away

come along if you feel alright  
come along you can free yourself  
come along do not fear the night  
come along and change the world

the future days are ours  
the numbers and the power  
we face the zero hour  
the guard tower will fall  
together we are tall  
they can't get us all

come along if you feel alright  
come along you can free yourself  
come along do not fear the night  
come along and change the world

we are relevant  
their time came and went  
we must not relent  
we are meant to stay  
stop fading away  
we're not fading away

come along if you feel alright  
come along you can free yourself  
come along do not fear the night  
come along and change the world
