

Incarceration Nation

build your prison people
complete the walls
build your prison neighbors
we will protect you all
build your prison children
we have assumed control
build your prison comrades
we own your minds and your souls

respect your AI wardens
they'll make it safe to live
and this surveillance web is
your protection grid
nestle in to the mega-city
no need for private land
your rented air and coffin home
are courtesies of life
within the master plan

give up your liberties
in the name of a greater nation
pay no attention to the
poppy-cocks above your station
we appreciate cooperation
in your servile subjugation
it's a lifeless, lovely lie
incarceration nation

build your prison people
complete the walls
build your prison neighbors
we will protect you all
build your prison children
we have assumed control
build your prison comrades
we own your minds and your souls
incarceration nation
incarceration nation
