

Ready to Fly

it's all passed me by
it's all passed me by
in the blink of an eye
it's all passed us by
it's all passed us by
we gave it all away
it's all passed us by

what if it's too late to shine
while you still live you own the time
what if it's too late to shine
while you're still breathing find the rhyme
the future is the night the sun no longer shines
but today is yours, today is mine
and I'm ready to fly
ready to fly

what if it's too late to shine
while you still live you own the time
what if it's too late to shine
while you're still breathing find the rhyme
the future is a dream that we all hope to find
but, today is yours, today is mine
what if it's too late to shine
while you still live you own the time
what if it's too late to shine
while you're still breathing find the rhyme
the future is the night the sun no longer shines
but today is yours, today is mine
and I'm ready to fly
ready to fly
