

## Snow Party

The snow has been falling all through the night  
by the morning the world is green and white  
and all the gray just fades away  
with the first coming of the white days  
and in the silent morning they come to life  
all the snow creatures from the snow night  
they hang the lights and they tune the band  
and there's brand new life up in snow land

It's a snow party for the snow men  
and for their snow ladies and their snow friends  
for the snow animals and snow birds  
there's snow music for the snow words  
it's time to celebrate the snow again

The rain has been falling all through the day  
and the evening comes to find water ways  
and the water forms into water folk  
it's party time, it's aqua days

It's a rain party for the rain men  
and the rivers flow from the snow end  
the rain ushers in a new day  
and the hopes' eternal for a new way  
it's time to celebrate the rain again  
at times it seems the rain will never end

The sun is shining, they're hot days  
and the sun folk form from the hot rays  
the heat, it rises, cicadas sing  
and the sun people do their sun things  
and the sun sings

It's a sun party for the sun men  
it's a warm feeling that the sun sends  
it's a bright dawning for the sun plays  
they live outside while the sun stays  
it's time to celebrate the sun again

It's a snow party for the snow men  
and for their snow ladies and their snow friends  
for the snow animals and snow birds  
there's snow music for the snow words  
it's time to celebrate the snow again

Colored trees and northern breeze  
seasons fall and summer leaves  
the sun is kinder with a gentle hand  
and the snow men wait just up in snow land
